Architecture plays an important role in the evolution of society. The way our structural surroundings work in concert with function and aesthetics affects us more than we realize, shaping how we live and influencing our cultural identity.

The composition, texture, size and shape of materials used in buildings or living spaces have a significant impact on how we perceive space. Brampton Brick is constantly evolving, taking all these factors into consideration when developing our wide selection of products, engineering our masonry and landscaping materials to stimulate an instant response. When you see homes, commercial buildings, driveways and landscaping projects that make an impression, you see Brampton Brick products.

As a leading integrated masonry and landscape products provider, Brampton Brick is the One Trusted Source among architects, landscape designers and consumers for quality, style and durability. The trust that our customers place in our company keeps us focused on our primary goal: to lead the way in innovation, affordability and lifetime satisfaction.

When you purchase Brampton Brick Masonry Products, you are making an investment in aesthetics, in longevity and in our company. We take this investment seriously. Motivated every day to “do more, do better”, we aspire to be the industry leader, evolving to meet the needs of our clients and stay ahead of market trends.

State of the art production facilities, meticulous quality control, seamless distribution, superior customer service – we ensure that our products are made to last while continuously exceeding our customers’ expectations.

Jeffrey G. Kerbel, President and CEO
Brampton Brick Limited

president’s message
CarbonCure’s technology uses CO₂ collected from cement and other factories. By retrofitting existing concrete manufacturing plants like Brampton Brick with CarbonCure™ technology, CO₂ gas is introduced into the concrete mix during production. When added to the concrete mix, the CO₂ undergoes a chemical reaction that converts it into a solid mineral and results in a stronger concrete product.

All of Brampton Brick’s Canadian concrete manufacturing plants have been outfitted with CarbonCure’s technology. The process may be applied to introduce carbon dioxide into any concrete product manufactured by a plant in which the technology is installed.

ENVIRONMENTAL STEWARDSHIP: A Shared Responsibility

ARCHITECTURE 2030
An initiative asking the global architecture and building community to adopt carbon reduction targets for buildings and products.

INTERNATIONAL ENERGY AGENCY BLUE MAP SCENARIO
29 countries working collectively to reduce greenhouse gas emissions with the goal to decrease CO₂ emissions significantly by 2050.

Look for the CarbonCure logo throughout this guide to help you identify products made with this green technology.
clay brick

Solid, functional and offering infinite flexibility in design and color combinations, clay brick is a premier building product for today’s homes. Brampton Brick’s clay bricks are built to last, and actually improve with age, taking on a warmer, richer appearance as the years go by. Worry and maintenance-free, clay brick will add to the value of your home with its durability, sound proofing and fire retardant capabilities. Brampton Brick’s clay bricks are your home’s best friend.

Today’s clay brick design trends call for clean lines, contemporary colors and subtle textures to balance linear stone treatments. This series is designed to complement stone accents with a full color palette ranging from neutral grays and taupes to rich reds.
Mediterranean Series

Color blends of blues, neutrals and gold hues inspired by Mediterranean sunsets create an elegant yet informal look that complements contemporary designs.

LEGACY SERIES
One of Brampton Brick's most established product lines, Legacy features natural shades that resemble the look of pressed bark, imparting a stately look to any home.
No other building material conveys long-lasting strength, beauty and permanence quite like stone. For centuries, stone has been the only choice for creating buildings of both stature and significance. Brampton Brick’s concrete stone products have captured those elements by engineering products with old world-charm. The look of chiseled stone dramatically elevates a homes appearance and adds immeasurable value. A wide array of color combinations allow for limitless design options for a home that commands attention.

VIVACE LINEAR PATTERN

4" STONE PATTERN

VIVACE LINEAR

The naturally aged appearance, 4-inch height and seven lengths of our Vivace Linear stone provides the perfect balance between contemporary proportions and gorgeous, natural colors. Vivace Linear, when used on its own brings drama contrasting a modern, linear pattern with a natural aesthetic. Combined with our Vivace or Artiste Stone, Vivace Linear presents a unique customization while staying true to your color palette. Textured ends on each stone means minimal waste and cutting.
Artiste, Harbour Mist with Tumbled Series, Westmont (left) Artiste, Shoreline with Crossroads Series, Ripley (right)
The Artiste Series is an extraordinary masonry veneer product line that elevates the curb appeal of any home with the look of hand-chiselled stone. Available in a palette of neutral colors and warm earth tones, Artiste is easy to install and allows for a variety of configurations by mixing sizes, lengths and combining with other Brampton Brick products.
All sizes and colors in this series are stock items.

**ACCESSORIES**

**FINESSE**

Courses out with Premier Plus brick and our Contempo, Granada and Artiste stone products.
RainBloc® technology

Concrete masonry walls produced with the RainBloc® integral water repellent resist wind-driven rain while still maintaining vapor transmission, reducing the chance of mold, mildew, and musty smells from developing inside a building. When used as an integral ingredient in our concrete masonry products, RainBloc® provides protection throughout the masonry unit to protect concrete masonry walls from moisture penetration.

To ensure your masonry wall system is completely water repellent you must remember to include the RainBloc® additive to the masonry mortar on site. Specify RainBloc® Water Repellent System when designing with Finesse.
architectural masonry

In addition to our vast product and color offerings for residential construction, Brampton Brick manufactures a full range of architectural brick and block products. Today’s manufacturing processes ensure consistent quality and strict engineering standards are met in all of our products, regardless of your building project.

### SELECT SERIES

With its straight edges and velour texture, Select Series colors were developed to fit the needs of today’s designers. Silver provides a contemporary look & feel, while Moroccan Red lends a more traditional appeal to design palettes. Our Valencia color takes the popular Marshall from our Crossroads Series and incorporates a clean look, where earth-toned projects are complemented by Kodiak’s soft brown tones.

DESIGNER SERIES
Designer Series is a brick that provides a wide variety of solid colors for all design needs. With its matte texture and finish, as well as the wide variety of solid colors and sizes, it is a product styled for conventional and contemporary use.
As you begin planning your dream home, Brampton Brick can help you pull together all the essentials of a solid exterior scheme. Consider the overall look and feel you want to achieve. Have some fun combining colors and textures. For a dramatic look, choose contrasting colors and textures. If you're looking for a more contemporary design, choose tones from the same color family, using similar textures or features for brick and stone. Brampton Brick is your One Trusted Source for brick and stone.

---

**Choosing a Color Scheme**

To help you on your way, we’ve grouped several similar color chips together below, to convey the overall tone of the product color.
Textures

Brampton Brick masonry products are developed to work together in both color and texture. When choosing your material, it is interesting to consider the effect of texture on the overall appearance of the structure. In the following pages, we have compiled several combinations designed to inspire your creativity, while considering the multitude of color and texture options available.

**SMOOTH**
The even surface of the smooth texture is attractive and gentle to the touch, but retains the durability you would expect.

**TUMBLED**
Additional manufacturing processes create a naturally aged or worn appearance.

**EMBOSSED**
Added visual appeal and a more natural texture make this a popular choice for exterior masonry veneer.

**QUARTZ**
Lightly shotblast surface creates a softer, more natural look and lighter coloration.

**SUAVE**
The surface is precisely ground to expose the aggregate and create extra-smooth finish.
